

FastAPI

```
from fastapi import Request
from fastapi.templating import Jinja2Templates
```

```
templates = Jinja2Templates(
    directory="webapp/templates")
```

```
@webapp_router.get("/")
def heels(request: Request):

    return templates.TemplateResponse(
        "heels.html",
        {
            "request": request
        }
    )
```

Using FastAPI() or APIRouter()

- Use Jinja2Templates() class
- Then TemplateResponse()
 - Needs the request
