

Fast**A**P**I**

```
from starlette.middleware.sessions import SessionMiddleware
```

```
from config import config
```

```
■ ■ ■
```

Using FastAPI() or APIRouter()

- Requires the definition of a middleware

FastAPI

```
from starlette.middleware.sessions import SessionMiddleware  
from config import config  
...
```

Using FastAPI() or APIRouter()

- Requires the definition of a middleware

FastAPI

```
from starlette.middleware.sessions import SessionMiddleware
from config import config
. . .

app = FastAPI()

app.add_middleware(
    SessionMiddleware,
    secret_key=config['WEBAPP']['SECRET_KEY']
)
```

Using FastAPI() or APIRouter()

- Requires the definition of a middleware
- The middleware needs to be added to the application
