FastAPI

```python
from utils import to_pretty_json

...

templates = Jinja2Templates(
    directory="webapp/templates"
)
```

Using FastAPI() or APIRouter()

- Is part of the `Jinja2Templates` class

FastAPI

```python
from utils import to_pretty_json

...

templates = Jinja2Templates(
    directory="webapp/templates"
)
templates.env.filters['to_pretty_json'] = to_pretty_json
```

Using FastAPI() or APIRouter()

- Is part of the `Jinja2Templates` class

- Use the variable `env.filters` to define filters
