```
{% block content %}{% endblock %}
```

```
{% if request.path != '/' %}
```

```html
<title>FastAPI + Auth0 Sample App </title>
```

```html
<link rel="stylesheet" href="/static/styles.css" />
```

```html
<html lang="en">
```

{% endif %}

```
{% include "nav_bar.html" %}
```

```html
<script src="/static/scripts.js"></script>
```

</body>

</head>

`</html>`

`</div>`

`<body>`

`<head>`

- Can also be directly linked

Using FastAPI() or APIRouter()

- But, you need to mount the

folder first

```python
from fastapi.staticfiles import StaticFiles
```

```
StaticFiles(directory="static"),
```

```
app.mount(
```

`"/static",`

name="static"

> .env

> auth

∨ static

  JS scripts.js

  # styles.css

> webapp

```
{% block content %}{% endblock %}
```

```
{% if request.path != '/' %}
```

```html
<title>FastAPI + Auth0 Sample App </title>
```

```html
<link rel="stylesheet" href="/static/styles.css" />
```

```
<!DOCTYPE html>
```

```html
<html lang="en">
```

```
{% endif %}
```

```
{% include "nav_bar.html" %}
```

```html
<script src="/static/scripts.js"></script>
```

</body>

</head>

`</html>`

`<body>`

`<head>`

<div>
